Tarikul Islam

Full Stack Developer

Summary

I'm a passionate Full-Stack Developer with a strong focus on building dynamic, user-centric applications. I enjoy solving complex problems, creating smooth and efficient user experiences, and continuously learning new technologies. Eager to contribute to innovative projects and grow in a collaborative environment.

Experience

Feb 2024 – Present

Self-initiated (Remote)

Full Stack Developer

Developed a messaging web app with real-time messaging and calling. Implemented a Load Shedding Notification System.

January 2024 - Present

BUBT

Web Developer

Worked on multiple academic and personal projects, focusing on responsive design and interactive web features using modern JavaScript frameworks like React and Node.js.

Education

January 2023 - December 2027

Bangladesh University of Business and Technology

Bachelor of Science in Computer Science and Engineering

Gained strong theoretical and practical knowledge in data structures, algorithms, software development, and web technologies. Actively participated in team projects, coding competitions, and tech workshops to enhance real-world problem-solving skills.
